NOTES

- POSITIVE ADMISSION INTERVIEW is valid also for the next academic year

CONTENTS of the INTERVIEW

- The interview will be an informal chat with the members of the Admission Commission in which your CV will be examined, and you will be given some suggestions on how to possibly fill some gaps, so that your university career proceeds optimally.
- For the above purpose, your preliminary Study Plan will also be examined (see point 2 of the instructions) and any critical issues will be highlighted, also answering your questions or requests for clarification.

Please note that this Study Plan is to be understood as absolutely preliminary and merely indicative of the preferences of the student, useful only for internal use by the Admission Commission or as a starting point for discussion during the interview. The official study plan must be completed and sent only after enrollment, in February 2026. Detailed information will follow and a special meeting with the President of the Teaching Council in January/February 2026 will follow.
